Notes for the Estrades Mineral Resource Statement

1.CIM definitions were followed for Mineral Resources.

2.No Mineral Reserves are present.

3.All metal prices, the US\$/CDN\$ exchange rate and cut-off grade were provided by RPA.

4.Mineral Resources are estimated at long-term metal prices (USD) as follows: Au \$1,450/oz, Ag \$21.00/oz, Zn \$1.15/lb, Cu \$3.50/lb and Pb \$1.00/lb.

5.Mineral Resources are estimated using an average long-term foreign exchange rate of US\$0.80 per CDN\$1.00.

6.Mineral Resources are estimated at a cut-off grade of CDN\$140/tonne NSR, which included provisions for metallurgical recoveries, freight, mining, milling, refining and G&A costs, smelter payables for each metal and applicable royalty payments.

7.Metallurgical recoveries for resource estimation are: Zn 92%, Cu 90%, Pb 85%, Au 80% and Ag 70%.

8.A minimum mining width of approximately 1.5 m was used.

9.Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.

10.Au Eq (g/t) and Zn Eq (%) represent the in-situ metal content expressed as Au and Zn equivalents and do not provide for metal recoveries or other economic considerations.

11.Preliminary analysis indicates that no metal is dominant; however, Au and Zn are the largest contributors.

12.Numbers may not add due to rounding.
