## Legend

Felsic Intrusion	Silurian Sediments
Mafic Intrusion	Felsic Volcanics
Ordovician Sediments	Mafic Volcanics
Exploration Drilling	Fault

## GOLD IN SOIL

- 7 – 10 ppb
- 10 – 15 ppb
- 15 – 1030 ppb
- Boulder >1g/t Au
- Till Au ppb
- Soil > 100 ppb

## STRONG EVIDENCE FOR MULTI-MILLION OUNCE DISCOVERIES

- All deposits associated with intrusions (stippled) and magnetic lows (blue)
- Gold anomalies in glacial tills (pink diamonds), soils (bright red-yellow), and boulders and chip samples – led to the discovery of all zones
- All zones are in a very small portion of Galway's highly prospective land position
- Just scratching the surface – Many new targets have stronger evidence than the evidence that led to the discoveries – see 1-6
